

Expertly Blended

A-Tops Pool Pre-Mix is blended from the finest South African vermiculite and Portland cement, with special additives to improve troweling and air entrainment.

A-Tops Vermiculite Swimming Pool Aggregate creates a smooth, permanent trouble-free vinyl pool bottom that is, firm, rot-proof, non-abrasive with no shifting and sliding.

With state-of-the-art blending equipment we insure a consistent mix of weight. The result is a high quality, reliable product for an efficient and cost effective pool system.

Our pool aggregate is packaged in 4-mil plastic bags, to prevent breakage and provide weather resistance. They can be shipped loose or in pallets.

MEMBER

Quality Since 1962

J.P. Austin Associates, Inc. is a leading manufacturer of vermiculite and has been doing business since 1962.

A-TOPS POOL MIX COVERAGE CHART*

| Rectangle pools | Grecian Pools |
|----------------------------|-----------------------------|
| 16 x 32 60 bags | 16'6 x 32'6 72 bags |
| 16 x 36 68 bags | 16'6 x 35'6 78 bags |
| 18 x 36 75 bags | 17'10 x 35'10 . . 88 bags |
| 20 x 40 95 bags | 20'9 x 40'9 . . . 102 bags |
| Lazy L Pools | |
| 18 x 43 92 bags | |
| 20 x 43 102 bags | |

*Based on 2" thick coverage. Figures are approximate and may vary with amount of water, mixing time, accuracy of excavation and troweling practice.

The A-TOPS Advantage

Longer Liner Life

Troweled to a smooth surface, A-Tops Vermiculite Pool Mix provides a non-abrasive substrate. A-Tops Pool Mix supports and cushions the vinyl liner much better than sand or Gunitite bases. A-Tops Pool-Mix cannot mold, decay or deteriorate from moisture contact and will help insulate the pool.

Longer Base Life

A-Tops Pool Mix contains millions of microscopic pores that permit moisture to pass through the base from above

and below. When the ground water table level rises; water passes through the pores without washing out the bottom. In addition, water leakage from the pool above follows the same path.

Better Bottom Line

A-Tops Pool Mix is a professional blend of Vermiculite, Portland Cement and special troweling additives that are precisely blended under strict quality controls to eliminate guesswork and material handling problems at the job site. Ease of installation along with time and money savings results in higher profit margins for you!

Easy to Mix & Apply

1. Place 5-6 gallons of clean water into a paddle type mixer.
2. Add 2 bags of A-Tops Mix while paddles rotate.
3. Rotate mixer 15 to 60 seconds. *Note:* Over mixing will reduce yield
4. Add or subtract water to accommodate for special weather, soil, temperature or job conditions.
5. Bucket or wheel mix to pnt of application and trowel smooth. *Note:* Do not over trowel.
